PARTNERS

We work with a number of experts across the whole spectrum of our business activities from project evaluation, pre-construction to final delivery of completed plants and then ongoing operations. Some of our valued Partners are listed below.

Paul Winter Consulting Ltd (PWCL) is a project management and construction support services company focused on the delivery of industrial and energy projects for clients, developers, investment and contracting organisations. With experience in all aspects of the construction industry, they provide professional advice and project management to clients from feasibility through to completion, commissioning and handover.

PWCL have been retained on each separate project to provide total oversight and management of the construction and delivery of all developments. They have worked with both Biogest and Thyson in the successful delivery of energy plants in the UK.

AMZCO Construction has a proven reputation in civil and environmental engineering, having delivered several complex anaerobic digestion (AD) construction projects on time and on budget. With our experience as a main and principal contractor we offer exemplary operational procedures when it comes to health and safety, environmental management and operational efficiency.

Thyson Technology offers a comprehensive range of engineering services for process industries ranging from design, build and commissioning of bespoke high-value analyser systems through to independent project management, contracting and specialist manpower resourcing and electrical maintenance services for water and waste treatment facilities. They provide expert engineering services for specialist gas installations including grid entry and gas upgrading.

OUR BIOMETHANE AND BIOGAS PLANTS are built using our tried-and-tested BIOGEST PowerRing, PowerCompact, PowerSPF or PowerDigest technology. These tools offer numerous advantages in terms of energy efficiency, operating safety, and availability. BIOGEST plants have been operating successfully for more than 30 years and over 160 reference projects have been completed to date.
